SUMMARY

Production Support Engineer with 5+ years of experience in L2 application support, production operations, and incident management. Skilled in SQL, Unix/Linux, Python, AWS CloudWatch, Amazon S3, ETL monitoring, and batch troubleshooting. Experienced in log analysis, data validation, REST API testing using Postman, and incident tracking through ServiceNow and Jira. Collaborates with development and infrastructure teams to resolve issues, meet SLAs, and improve application reliability.

TECHNICAL SKILLS

Application & Production Support: L2 Application Support, Digital CRM Portal Support, Incident Management, Service Requests, SLA Tracking, Issue Escalation, Root Cause Investigation
Programming Languages & Backend Technologies: Java, Python, JavaScript, Node.js, Object-Oriented Programming, Exception Handling, REST APIs
Operating Systems & Scripting: Unix/Linux, Shell Scripting, Python, Log Analysis, File Permissions, Process Monitoring
SQL & Databases: SQL, MySQL, PostgreSQL, Oracle, Joins, Subqueries, CTEs, Data Validation, Data Reconciliation
API Troubleshooting & Testing: REST APIs, SOAP Web Services, Postman, Swagger/OpenAPI, HTTP Status Codes, JSON, XML
Monitoring & Logging: AWS CloudWatch, Prometheus, Grafana, Application Log Analysis, Alert Investigation
Batch & ETL Operations: ETL Job Monitoring, Batch Troubleshooting, File Availability Checks, Data Load Validation, Approved Job Restarts
Cloud & Deployment Tools: AWS, Amazon S3, Jenkins, Docker, Kubernetes, Git, GitHub, Bitbucket, Maven, Gradle
Application Servers: Apache Tomcat, WebLogic
Incident Tracking & Collaboration: ServiceNow, Jira, Technical Documentation, Runbooks, Shift Handover, Agile/Scrum
Environments: Development, UAT, Production, Unix/Linux, Windows

EXPERIENCE

Meta – Production Support Engineer **Oct 2025 – Present**

- Provided L2 production support by investigating incidents, assessing operational impact, and collaborating with engineering and infrastructure teams to resolve issues and restore system availability.
- Monitored scheduled ETL jobs and data processing workflows, reviewed execution logs, and investigated failures, delays, and incomplete data loads to support timely downstream processing.
- Performed ticket-based data corrections using SQL, validating affected records, obtaining required approvals, and verifying results after updates to maintain data accuracy.
- Used Unix/Linux commands to inspect application logs, check processes and file availability, and troubleshoot issues affecting production applications and batch processing.
- Monitored AWS resources and application logs through Amazon CloudWatch, investigated alerts, and supported resolution of processing failures and application errors.
- Managed incidents and service requests through ServiceNow and Jira, documenting investigation steps, tracking SLA deadlines, escalating unresolved issues, and maintaining shift handover notes.

GoDB Technologies – Associate Software Engineer **Nov 2021 – Jun 2023**

- Developed and maintained backend services for the TAGIC Health insurance application using Node.js and JavaScript, supporting business requirements and application enhancements.
- Designed and enhanced REST APIs to enable data exchange between frontend interfaces and backend services across application workflows.
- Implemented server-side input validation, structured error handling, and business logic to improve API reliability and maintain consistent application behavior.
- Conducted API testing using Postman to verify request and response formats, validate status codes, and investigate integration defects.
- Updated interface components using HTML and CSS and collaborated with frontend developers to integrate APIs and resolve functionality issues.
- Supported application deployment and monitoring activities on AWS, investigating runtime issues and assisting with troubleshooting. Managed development tasks and defects through Jira, collaborating with developers and QA teams to clarify requirements and verify fixes.

EDUCATION

Master of Science in Computer Science **Aug 2023 – May 2025**
University of North Texas, Denton, Texas, USA

Bachelor's in electrical and Electronics Engineering **Jul 2015 – Jun 2019**
PBR Viswodaya Engineering College, AP, India
